## Stratos I Awning

### *create the outdoor room*

Aluxor's awnings add charm to any setting while providing a perfect indoor outdoor environment for entertaining, day or night.

The Stratos I is a classical awning that protects against the sun or light rain as well as creating a cosy and private ambience. Ideal for patios, verandahs, balconies and restaurants, the retractable roof system creates a large pavilioned space free of structures and poles.

The Stratos I can also incorporate the **Oversquare** feature, enabling the projection to be greater than the width. Where additional protection is required the awning can also be fitted with an extruded aluminium pelmet to your choice of colour.

A **Vario Volant** option is also available whereby a retractable vertical fabric screen is fitted inside the front rail. This is ideal for blocking out sun glare from west facing locations while retaining views.

### Selectapitch®

Another special feature of the Stratos I is the angle adjusting system Selectapitch®. With this feature you can change the angle of the awning to block the morning or afternoon sun, or even use it as a rain shelter in calm conditions.

Any angle from horizontal to vertical can be easily and quickly set, with the crank handle adjusting both arms simultaneously.

**All operating components** are designed and manufactured in Germany and certified by international testing agency TÜV to the European standard 'CE Marking'.

**The Secuflex 70II folding arms** use tensioned, spring loaded, PVC coated triple steel cables that provide added protection against corrosion. These cables are individually hung to provide excellent wind stability and fabric tension.

**The Secuflex 70II arms are able to withstand** 120,000 cycles of stress, as certified by Materials Testing Authority of Germany.

**Patented pivot ball** front bar connector provides the best possible operational safety.

**Extruded aluminium profiles** for pelmets and cassettes provide solid, stable and long lasting quality that will not rust or vibrate in harsh conditions.

**Construction hardware** is made of marine grade 316 stainless steel.

**Powdercoated galvanised steel** support bars have a high durability epoxy undercoat, Pacesetter HP200, 160 microns thick to provide additional anti-corrosion protection.

**Patented aluminium brackets and components** with pre-treated baked enamel finish.

## Specifications

<i>Dimensions (h x d)</i>	✓ 215 x 130mm
<i>Dimensions pelmet (h x d)</i>	A 240 x 230mm
<i>Width single unit / coupled</i>	✓ 2m – 7m / 21m maximum
<i>Projection range</i>	✓ 1.5m – 4m
<i>Selectapitch</i>	A 6m x 3.5m maximum
<i>Premium arm adjusters</i>	A 8m x 4m maximum
<i>Vario Volant</i>	A Vertical screen to 2m
<i>Standard frame</i>	✓ White, silver or cream powdercoated
<i>Frame custom colour</i>	A 140 colours powdercoated
<i>Standard pelmet</i>	A White, silver, cream, beige, black or dark grey colours powdercoated
<i>Custom pelmet</i>	A 140 colours powdercoated
<i>Fabric</i>	✓ Acrylic canvas with valance
<i>Operating mechanism</i>	✓ Manual
<i>Automation features</i>	A Motorised, sun, wind & timer systems
